&
How to use this book

A: Original form of धातु with इत् letters and स्वरs found in धातुपाठः

B: Meaning of the धातु found in धातुपाठः

C: Dictionary form of धातु without इत् letters and स्वरs

D: [1 to 10] Clasification in terms of how धातु conjugates

E: [P, A or U] पदs

"P" stands for परस्मैपदी धातु which takes परस्मैपद-प्रत्यय.

"A" stands for आत्मनेपदी धातु which takes आत्मनेपद-प्रत्यय.

"U" stands for उभयपदी धातु which takes आत्मनेपद-प्रत्यय when the result of action goes to the doer of action. Otherwise, the धातु takes परस्मैपद-प्रत्यय.

F: [S, A, or V] This is about इट्-आगम, the augment इ which is attached to the beginning of certain types of suffixes.

"S" stands for सेट् (इटा सह वर्तते), a धातु which takes इट्.

"A" stands for अनिट् (अविद्यमानः इट् यस्य सः), a धातु which does not take इट्.

"V" stands for वेट् (वा इता वर्तते), a धातु which optionally takes इट्.

G: Meaning of the धातु in English

H: Name of गण (group) which the धातु belongs to. This is connected to the second section, "2. Classification of roots - ten conjugations and groups"

In धातुपाठः, about 2000 धातुs are classified into 10 groups (गणs) by how the conjugation takes place. Further, there are sub-groups within those 10 groups. This section shows the purpose of these sub-groups with sūtras which enjoin the changes to those धातुs.

The combinations of धातु and उपसर्ग with meanings in English are shown.

This section shows the purpose of indicatory letters to धातुs, with sūtras and examples.
